

ROBUST, RELIABLE MATERIAL HANDLING SOLUTIONS

MOBILE STACKER

- Conveyor lengths of 20ft to 100ft.
- Can accept constant flow loads.
- Impressive radial stockpiling ability.

TRACK STACKER

- Conveyor lengths of 50ft to 100ft.
- Can accept constant flow loads.
- Perfect for frequent repositioning.
- Conical stockpiling ability.

RADIAL TRACK STACKER

- Conveyor lengths of 80ft to 100ft.
- Can accept constant flow loads.
- Perfect for frequent repositioning.
- Impressive radial stockpiling ability.

FEED TRACK STACKER

- Conveyor lengths of 40ft to 90ft.
- Can accept loads directly from excavator and wheel loader.
- Conical stockpiling ability.
- Chassis format options: mobile, track, static or 360° unlimited.

LOW FEED STACKER

- Conveyor lengths of 50ft to 75ft.
- Can accept loads directly from excavator, or wheel loader.
- Conical stockpiling ability.
- Chassis format options: mobile, track, static or 360° unlimited.

360° UNLIMITED

- Available as a Feed Track or Low Feed chassis format.
- Conveyor lengths of 40ft to 75ft.
- Can accept loads directly from excavator and wheel loader.
- Radial stockpiling ability.

RADIAL TRUCK UNLOADER

- Can accept loads directly from excavator, wheel loader and trucks.
- Perfect for frequent repositioning.
- Impressive radial stockpiling ability.
- Eliminates the double handling of material.

WORLD LEADING SHREDDING, SCREENING & SEPARATION TECHNOLOGY

SLOW SPEED SHREDDERS

- Slow speed, twin shaft, high torque shredding solution.
- The lowest maintenance cost shredders on the market.
- Robust design provides high durability to difficult to shred materials.

WHEELED & TRACK TROMMELS

- Choose from the TR622 or TR516 Range.
- Format options of track and wheeled.
- Combines intelligent load sensing with impressive 180° radial stockpiling ability.

MATERIAL CLASSIFIERS

- Choose from the MC1200 or MC1400 Range.
- The latest advancement in "Light V Heavy" material separation.
- Extract impurities from highly contaminated material in just one pass.

MOBILE PICKING STATIONS

- Modular design allows picking bays to be added or subtracted as required.
- Robust, durable design with variable belt speed.
- Variable working heights to suit a range of skip / dumpster sizes.

FLIP FLOW SCREENS

- The most aggressive flip flow screen on the market.
- Eliminates screen plugging and blockages.
- Ideal for the processing of sticky, moist materials with a high percentage of fines.

TRACK ROLL SIZERS

- Designed for the secondary and tertiary crushing of medium-hard, sticky and soft materials.
- Huge reduction in fines creation levels.
- Tramp metal release system against non-crushable materials.
